Projects

GyaanPariksha - Online Examination System

Languages/Technologies - pHP, MySQL, HTML, CSS, JS

Environment - VS Code, XAMPP, MySQL

Description - The GyaanPariksha is an advanced web-based platform designed to facilitate efficient and secure conduction of examinations, assessments, and quizzes over the internet. The system aims to replace traditional paper-based examinations, providing numerous benefits such as reduced administrative workload, enhanced accessibility, and improved accuracy in result processing.

Time Table Generator

Languages/Technologies - pHP, MySQL, HTML, CSS, JS

Environment - VS Code, XAMPP, MySQL

Description - The Time Table Generator is an advanced web-based tool designed to streamline the creation of schedules and timetables for educational institutions, businesses, or any organization requiring efficient time management. This system aims to replace manual timetable creation, offering several advantages, including reduced administrative workload, improved scheduling accuracy, and enhanced accessibility for both administrators and end-users.

ChatBuddy - Chatting App

Languages/Technologies - Java, XML

Environment - Android Studio, Firebase

Description - ChatBuddy is an advanced Android-based chat application empowered by Firebase and secure communication over the internet. This app aims to revolutionize the way people connect, replacing conventional messaging with a digital experience that offers numerous advantages. Key features include reduced workload for users, enhanced accessibility, and a heightened level of accuracy and synchronization. ChatBuddy represents the future of mobile communication, bringing people closer together in the digital age.
