- Playing Outdoor Games
- Listening to music that helps in Stress Management

Projects

GyaanPariksha - Online Examination System
Languages/Technologies - React JS, MongoDB
Environment - VS Code, MongoDB

Description - The GyaanPariksha is an advanced web-based platform designed to facilitate efficient and secure conduction of examinations, assessments, and quizzes over the internet. The system aims to replace traditional paper-based examinations, providing numerous benefits such as reduced administrative workload, enhanced accessibility, and improved accuracy in result processing.

Time Table Generator
Languages/Technologies - React JS, MongoDB
Environment - VS Code, MongoDB

Description - The Time Table Generator is an advanced web-based tool designed to streamline the creation of schedules and timetables for educational institutions, businesses, or any organization requiring efficient time management. This system aims to replace manual timetable creation, offering several advantages, including reduced administrative workload, improved scheduling accuracy, and enhanced accessibility for both administrators and end-users.
